

Moving your Backup to the Cloud is Easy with WOW! Business

Veeam® Cloud Connect for Fast and Secure Cloud Backup

Protection of your valuable data through a secondary back up to tape may have been adequate up to this point. However, if you're serious about data security and protecting the longevity of your business, it's time to move your backup offsite to the WOW! Cloud through Veeam® Cloud Connect. WOW! Business' long-standing partnership with Veeam® as an Authorized Cloud Service Provider makes your transition to a Cloud backup quick and seamless if you're already using Veeam®.

Veeam® is the clear leader in Data Availability and Protection Solutions, giving you a higher level of Availability than legacy backup solutions. Because Veeam® Cloud Connect is built into the suite of Veeam® software, you can easily leverage the WOW! Cloud for your geo-redundant backup needs.

Through our partnership with Veeam®, WOW! Business Cloud Services provides the offsite cloud repository you need to stay compliant and avert the unnecessary risk of all data sitting at one location or expensive, costly, and unreliable legacy tape solutions.

Value to the End User

- › Veeam® Cloud Connect allows for a seamless and secure connection to WOW! Business for off-site Cloud Backup.
- › The software provides a tertiary backup to comply with the 3-2-1 rule (3 copies - two different media - 1 backup offsite).
- › WOW! customers experience no constraints for retrieving data over-the-wire.
- › As an ISP, WOW! can temporarily increase your internet capacity to allow for a download of any large backup copies *OR* can seed your data and overnight a drive for you to import.
